

## Novugen's 1st International Cardiometabolic & Urogynecology Summit (NICUS)

As our journey to strengthen Novugen's global presence continues, we are proud to share about Novugen's 1st International Cardiometabolic & Urogynecology Summit (NICUS), an event organized by our local Sales & Marketing team and colleagues from Novugen Uzbekistan. NICUS was a platform that offered unique opportunities for leading specialists in the healthcare field from Malaysia and Uzbekistan to exchange clinical knowledge, expertise, and meaningful insights of medical advancement from prominent figures in the medical field.

The five days event was held in the Old City of Istanbul, Turkey. We are very proud to have welcomed all participants from thousands of miles away and gathered an exceptional line of speakers coming from different countries bringing strong knowledge of the industry - Dr. Radhakrishna A Sothiratnam, Consultant Internal Medicine Physician, Prof. Ali Yagız ÜRESİN, a Professor in Istanbul University, Istanbul Medical Faculty, and Prof. Giyasov Shukhrat Iskandarovich, the Director of postgraduate education of urology department at Tashkent Medical Academy and Republican specialized centre of urology (Uzbekistan) and Moscow Medical Academy named I.M.Sechenov, Moscow (Russia).

Many valuable topics were discussed during the international summit. These include diabetes treatment, diabetic neuropathic pain (DNP), statin and management of atherosclerosis,

erectile dysfunction treatment, hypercholesteremia and men's health. Through engaging sessions designed to create a conducive environment, the topics were delivered effectively and initiated meaningful dialogues that sparked innovative ideas. We truly believe that the event is a powerful tool not only for diversifying the participants' knowledge on the medical field, but also to create a substantial global network.

“Thank you Novugen team for the great effort, organizing this impressive summit in Istanbul. I am eager to hear more about the company's progression in the pharmaceutical field. It was also a pleasure to meet an outstanding group of doctors and broadening my network horizon internationally. I truly hope that we will meet again.” a participant, commented.
