

Driving Innovation Through Collaboration with Malaysia's Leading Universities

3 July 2025

On 3 July 2025, Novugen had the honour of hosting passionate delegates from Universiti Kebangsaan Malaysia (UKM) and Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA) at our Novugen Pharma manufacturing facility. With the primary objective of exploring strategic areas of collaboration between Novugen and these two esteemed universities, the engagement marked a significant step forward in our ongoing MoU efforts to bridge academia and industry.

Building on the strong foundation of academic excellence from UKM and UMPSA and Novugen's commitment to innovation and talent development, the discussions centred on shaping impactful, long-term initiatives. Key areas explored included industrial training, research collaboration, and curriculum alignment to better equip graduates for real-world industry demands.

Our vision remains clear. Through open dialogue, meaningful knowledge exchange, and mutual understanding, we established strong alignment on key areas of collaboration. By leveraging the institutional strengths of both universities, we identified opportunities to co-develop career pathways and cultivate future-ready talent to drive pharmaceutical innovation forward.

As we look ahead, Novugen remains committed to embarking on impactful initiatives and collaborations, to empower a future-ready pharmaceutical workforce. This reflects our unwavering commitment to ensuring that every step we take contributes meaningfully to nation-building.
