

Novugen Evidence Exchange (NEX) Penang: General Physician Evidence Exchange 22 August 2026

Our recent Novugen Evidence Exchange (NEX) meeting in Penang gathered 160 healthcare professionals from across Malaysia's Northern and East Coast regions for an afternoon of scientific exchange, collaboration, and clinical learning.

Through expert-led sessions, interactive discussions, and real-world perspectives across five key clinical areas, the event connected healthcare professionals across specialties and regions — creating opportunities to share knowledge, strengthen professional connections, and translate evidence into everyday patient care.

At Novugen, we believe that knowledge shared is progress multiplied. Through NEX, we remain committed to fostering scientific dialogue, connecting medical experts, and advancing healthcare outcomes nationwide.
