

Novugen at the Forefront of Global Pharma IP Dialogues

March 2025

Novugen was honoured to participate in two major Intellectual Property (IP) events in March 2025 — the 9th IIPSS Summit and the 14th Annual Pharma IPR Conference, held in Hyderabad and Mumbai. Representing the company was Dr. Archana Roy, Senior Director and Head of Global IPM, who also served as a guest panelist at both forums. These gatherings brought together over 250 IP professionals, in-house counsels, and global law firms, creating a dynamic platform for sharing insights across the pharmaceutical IP landscape.

The conferences featured impactful panel discussions and expert-led sessions on the evolving challenges and opportunities in pharmaceutical IP and portfolio management. Novugen's engagement with policymakers, legal experts, and industry leaders reinforced our role in shaping a resilient, future-ready healthcare system. These interactions not only strengthened our global collaborations but also affirmed our commitment to advancing access to high-quality, affordable medicines worldwide.
